

IASME Consortium[®]

Get **Cyber Essentials** and **IASME Governance** certification for your organisation

Certify from only
£300 + VAT

"We're delighted to have gone through the process, which was adeptly handled by IASME"

Proelium Law LLP

The IASME Consortium is the leading Accreditation Body for the government-backed Cyber Essentials certification scheme and the award-winning IASME Governance standard.

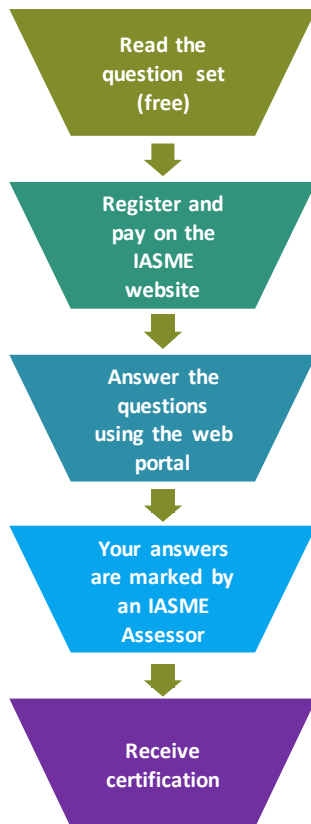

The IASME Governance standard takes your organisation to the next level of security and covers similar topics to ISO 27001 in a practical manner.

Achieving either standard is a great opportunity to shout about security to your customers!

We operate a network of over eighty Certification Bodies who can assist you in achieving certification. We also offer training for those who need to better understand the process for their organisation.

Why should I get my organisation certified and what is involved?

How to achieve Cyber Essentials or IASME Governance

Why get certified?

Complying with either certification significantly reduces the risk of your organisation becoming a victim of a cyber attack.

The certifications show your customers that you care about the security of their information and help you win their trust

Cyber Essentials is mandated in most UK government tenders and the supply chain of many FTSE100 companies.

Also, almost all companies in the UK Defence supply chain will require Cyber Essentials.

How long does it take?

- You will get access to the web portal immediately after paying
- Answer the questions (you have up to six months to do this)
- It usually takes less than 48 hours to have your answers marked and award certification
